*Digital Access to Healthcare Tip Sheet*

# Connecting with your Healthcare Team using modern communications technology

https://www.hsidn.org/

The goal of the Healthy Southern Illinois Delta Network (HSIDN) is to transform Southern Illinois into a region that supports and enhances healthy living. A top priority of the HSIDN is to improve access to quality healthcare for our region's residents.

As healthcare systems/providers in Southern Illinois strive to provide services to community members when and where they need care, it's important to know that modern communications technology is making the ability to connect to quality healthcare easier and more efficient than ever.

Using a personal electronic device (desktop computer, laptop, tablet, smartphone) to access your health information allows, in most instances, for you to communicate with your doctor, request prescription refills, manage you bills, access your test results, manage/schedule appointments and more.

If you haven't already done so, please explore connecting with your healthcare system/provider through the health information portal(s) listed. If you wish to request access to a specific health information portal, you may need to contact your healthcare system/provider by telephone to request the appropriate sign-in credentials.
