WHAT IS THE ILLINOIS TOBACCO QUITLINE?

The Illinois Tobacco Quitline (ITQL) is a free telephone resource that provides tobacco cessation counseling and information to tobacco users who want to quit tobacco use, and tobacco cessation material to individuals requesting information to give to a tobacco user.

Nicotine replacement therapy (NRT) may be recommended in combination with cessation counseling. Depending on funding and availability, nicotine patches may be provided to eligible ITQL callers through the Illinois Department of Public Health statewide NRT distribution program. In addition to telephone counseling services, ITQL offers web-based services including general information about ITQL, response to information requests about tobacco cessation, online interactive counseling, and e-mail referrals and requests for a call from an ITQL counselor.

WHO STAFFS THE QUITLINE?

ITQL is staffed by tobacco treatment specialists, registered nurses, and respiratory therapists who have received training in tobacco cessation counseling. Both English and Spanish-speaking counselors are available on the ITQL staff. For callers who speak other languages, an interpretation service with access to more than 200 languages is used. For callers who are Deaf or hard of hearing, counseling is provided through video relay or TTY: 1-800-501-1068.

Business hours are 7:00 a.m. to 11:00 p.m. (CST) daily, and messages received outside of business hours are returned within 24 hours. ITQL is funded by the Illinois Department of Public Health and managed by the American Lung Association in Illinois.

WHY SHOULD I BECOME A QUITLINE REFERRAL PARTNER?

Nationally recommended best practices indicate that tobacco users are more likely to attempt quitting tobacco if a community-based organization supports quitting and refers the client for cessation treatment. All tobacco users should receive advice to quit and should be offered brief or more intensive counseling services (in person or via a quitline) and FDA-approved cessation medication, if indicated.

Telephone quitlines have been shown to be effective in providing wide access to evidence-based cessation counseling. Healthcare providers and systems can take advantage of the availability of ITQL services by implementing a system that regularly refers patients to ITQL through electronic or fax referrals. As an ITQL referral partner, a healthcare provider will be able to easily, quickly, and effectively refer patients who are tobacco users for cessation counseling and support.

HOW DO I BECOME A QUITLINE REFERRAL PARTNER?

Any community-based organization, facility, or system that provides healthcare services to tobacco users may register as a Quitline Referral Partner. Providers who wish to register or have additional questions should contact their local health department or the ITQL. After the organization has been registered as a Quitline Referral Partner, training to integrate the referral process into clinical practice and necessary referral forms will be provided by ITQL.

GETTING STARTED

AS A QUITLINE HEALTHCARE REFERRAL PARTNER

1-866-QUIT-YES
Se habla español.

HOW DO I DETERMINE IF A PATIENT SHOULD BE REFERRED?

During each office visit with a patient who uses tobacco products, a healthcare provider should use a brief tobacco intervention such as the 5As (Ask, Advise, Assess, Assist, Arrange) or Ask, Advise, Refer to determine a patient's smoking status and readiness to quit. If the patient is contemplating quitting or is ready to quit, the provider should complete the Illinois Tobacco Quitline (ITQL) Tobacco Treatment Enrollment form, and submit it to ITQL by the method specified in the healthcare provider's Quitline referral agreement.

Before implementation of the Quitline referral program in a healthcare facility, the ITQL team will provide training to staff who will be involved in the referral process. Training will cover completion and submission of the Tobacco Treatment Enrollment form, Brief Tobacco Interventions, and additional skills for talking to patients about tobacco use.

HOW DO I SUBMIT A REFERRAL?

Referrals to ITQL may be submitted by fax or electronic fax through the ITQL website. ITQL will provide each new referral partner with a customized Tobacco Treatment Enrollment form containing the provider's organization logo or name and a provider identification number.

When completing a referral to ITQL, the provider must obtain the signature of the patient, patient representative, or act as the authorized representative for the provider to release information on the enrollment form to ITQL. Without a signature, ITQL will not be authorized to contact the patient.

ARE YOU ABLE TO TRACK HOW MANY REFERRALS MY OFFICE SUBMITS?

Use of the client identification number will enable ITQL to track referrals accurately for individual providers. Providers will be able to access aggregate data and reports.
